BILOXI NURSERY

JAMES BRODIE, Proprietor

BILOXI, MISSISSIPPI

Biloxi Nursery has been in operation for over twenty-five years, and the present owner has been in charge of the property for a similar period.

Past experience and the continued patronage of old friends who have added to my list of patrons, gives the all important support, encouragement and confidence, on which the present list is issued.

In thanking my friends for their support, I can assure them the stock now ready for shipment is of equal quality to any I have grown, and furthers the confidence and pleasure I take in supplying the best possible material.

I exercise great care to keep varieties true to name and will replace free or refund the purchase price of any that may prove otherwise, but I am not liable for other damages.

I do not guarantee trees or plants to live. I handle them with the utmost care, pack properly and deliver to the carrier in good order. My responsibility then ceases. The risk and cost of transportation is yours.

TERMS: Cash.

SHIPPING Precise instructions solicited. The express companies give a special rate (second class) on trees and plants, the charges being about 20 per cent less than on general merchandise. We recommend express, unless the order is for heavy trees.

PACKING. All trees or plants f. o. b. Biloxi, Miss.

CERTIFICATE OF INSPECTION will be attached to every package.

REFERENCE: FIRST NATIONAL BANK or any business house in Biloxi.

MEMBER Southern Nurseryman's Association.

GRAFTED PECANS

Stuart, Success, Schley, Pabst, Van Deman. All these varieties are of special merit.

On the Coast the pecan comes to its greatest perfection as a "yard" tree ;this shows it requires a rich or well fertilized soil. Trees should be planted 50 feet apart.

	Each	Per 10
6 to 7 feet	\$2.00	\$17.50
5 to 6 feet	1.50	14.00
4 to 5 feet	1.00	9.50
3 to 4 feet85	8.00
2 to 3 feet75	7.00

Selected trees, 7 to 9 feet, \$2.50 to \$3.00.

PECANWOOD

Cions, average 6 inches, \$2.00 per 100.

ORANGE—ON *Citrus trifoliata*

Under the provisions of the Mississippi Plant Oct. Rule 30. "All nursery stock, except those plants that will not stand defoliation, shall be completely defoliated, including leaf-stalks. Citrus must always be defoliated." Nurserymen and purchasers must be governed by this ruling.

All citrus will be pruned to such height as will secure the best results in transplanting.

I suggest sale by caliper for all heavy grades; that is the thickness of the stem one inch above the bud, and not the height, will govern.

Citrus trees pruned and defoliated, give, as a rule, better results than those dug and shipped with foliage on.

Lue Gim Gong, 5 to 6 feet, one or two years old, caliper, 3-4 and up.....\$1.00

ROSES

justly Roses are the pride of the Southern garden. and the lower coast is celebrated for its perfect specimens and thrifty plants.

All roses offered in this list are field-grown. Strong budded plants.

Climbing Roses carefully trained and pruned invariably give best results.

Bush Roses. Tea, Hybrid Tea, and a few of the Hybrid Perpetuals also prove highly satisfactory in the Southern belt.

For the season 1920-21 I can offer but one grade of roses.

No. 1 First class strong field grown. All others sold. Price, unless otherwise lister, Each 50c

CLIMBING ROSES

American Beauty, N. H. Pink
Clothilde Soupert, P. White, shaded with rose
Crimson Rambler, C. P. Bright Crimson
Devoniensis, T. Creamy, white, rosy center

ARBOR-VITAE

Pyramidal, 18 to 24 inches	.50
Selected plants	1.00

UNSOLICITED TESTIMONIAL

Jamaicia, B. W. I., June 20, 1920.

"The roses you sent have been an enormous success, and no words can express our appreciation of them nor our admiration for the method of packing you adopt which allows every rose plant to come out here in such a condition that none is lost."
